DETAILED ACTION

Application Background

- This action is responsive to the Request for Continued Examination, filed on 2/6/2007.
- 2. Applicant has amended claims 1-15, 18-21 and 24; and added new claims 26-28.
- 3. Claims 1-28 are pending in the case, claims 1, 10, 18, 21 and 26 are independent claims.
- 4. A request for continued examination filed under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after a final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office Action (dated 9/8/2006) has been withdrawn pursuant to 37 CFR 1.114.
- 5. The examiner's rejection of claims 1-25, made under 35 USC 101, as recited in the previous office action (dated 9/8/2006) are withdrawn in view of the amendments and applicant's remarks. However, new grounds of rejection are described below.

Application/Control Number: 10/643,031 Page 3

Art Unit: 2178

6. The examiner's rejection of claims 1, 10, 13, 18, 21 and 24, made under 35 USC 112, as recited in the previous office action (dated 9/8/2006) are withdrawn in view of the amendments.

- 7. The examiner's rejection of claims 1-6, 8-12, 14-23 and 25, made under 35 USC 102, as recited in the previous office action (dated 9/8/2006), are withdrawn in view of the amended claims. However, new grounds of rejection are described below.
- 8. The examiner's rejection of claims 7, 11 and 24, made under 35 USC 103, as recited in the previous office action (dated 9/8/2006), are withdrawn in view of the amended claims. However, new grounds of rejection are described below.

Claim Rejections - 35 USC § 101

9. 35 U.S.C. 101 reads as follows:

"Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title."

- Claims 21-25 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.
- 11. **Regarding Claims 21-25**, the claims lack the necessary physical articles or objects to constitute a machine or a manufacture within the meaning of § 101. They are clearly not a series of steps or acts to be a process nor are they a combination of chemical compounds to be a composition of matter. As such they fail to fall within a statutory category. They are, at best, functional descriptive material, *per se*.

Art Unit: 2178

Claim Rejections - 35 USC § 102

Page 5

12. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

"A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States."
- 13. Claims 1-28 are rejected under 35 U.S.C. 102(b) as being anticipated by Elmore et al., US Patent Publication 2006/0059107, filed 3/30/2001, published 3/16/2006 (hereinafter Elmore).
- 14. Regarding independent claim 1, Elmore discloses validating markup language text. Elmore discloses his invention as an e-business online commerce solution (see paragraph 4), where the online solution is provided using markup language (see paragraphs 38, 39, 66, 69, 103, 104 106 etc. for examples of how the invention is implemented using HTML and XML). Elmore discloses validating the markup text. Elmore recites: "The interconnect service EJB provides an interface that the activity smart components use to access external systems 110. Messages that contain information for external systems 110 are sent from the eBusiness support system through a particular type of communications messaging interface (CMI) 105. Examples of these CMI types include credit card validation, address validation, and service reservation, etc" (paragraph 65).

Application/Control Number: 10/643,031

Art Unit: 2178

Elmore discloses the use of validation delegates. Elmore recites: "Integration Layer 102, through which Smart Components 104 access external systems 110. The interconnect service within this layer uses communications messaging interfaces (CMIs) 105 and adapters 106/107 to transport messages. The CMIs are pre-defined interfaces to common services (e.g. rating, address validation, service reservation, etc.) needed to complete client requests for customer, pre-order, order, and post order transactions. The EAI Adapters 106 provide the flexibility to integrate with an EAI package 109. These adapters are configurable software interfaces for different EAI packages, such as Vitria BusinessWare or BEA eLink. Other adapters are also available" (paragraph 37).

Elmore discloses validation tables in the form of libraries. Elmore recites: "JavaScript Libraries. The JavaScript libraries are used for client-side validation. js_validation. js provides JavaScript methods for validating data to submit to the server. For example, it is used to verify that the required fields are filled in by the user. Client-side validation should be used in conjunction with server-side validation. The former is not a replacement for the later. Although client-side validation may enable a better user experience by performing validation on the fly, it exposes the application to security risks from users who could bypass the JavaScript and submit erroneous data to the database. The JavaScript libraries are also used for input and form submit manipulation. js_common.js provides javaScript methods for setting request

parameters and passing variables and values to the server" (paragraphs 125-127).

Elmore discloses validating text by using validation delegates and validation tables, as described above. Elmore discloses a plurality of elements, related to each other in a tree representation, where there exist roots and subtrees of elements in figure 12.

- 15. Regarding dependent claims 2, 3, 6 and 9, Elmore discloses determining if a validation table contains no validation delegates (claim 2), identifying and executing a third validation delegate (claim 3), making a validation decision (claim 6) and validating text (claim 9). Elmore discloses Business Rule Adapters in Figure 1 at reference sign 107. Business rule adapters specify the determining, identifying, decision-making and validating required for the specific business problem being solved.
- 16. Regarding dependent claims 4 and 7, Elmore disclose the use of flags to implement the business logic of the ecommerce interface see paragraphs
 72, 87 and 89 for some examples).
- 17. **Regarding dependent claim 5**, Elmore discloses a plurality of validation tables, as described above (described as a plurality of libraries).
- 18. **Regarding dependent claim 8**, Elmore discloses the delegates as interpretable code see the code listing after paragraph 64.

19. **Regarding claims 10-28**, the claims are directed toward a method, system and computer readable media for the computer-readable medium of claims 1-9, and are rejected using the same rationale.

Response to Arguments

20. Applicant's arguments with respect to claims 1-28 have been considered but are most in view of the new ground(s) of rejection, as described above.

Conclusion

21. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Gregory J. Vaughn whose telephone number is (571) 272-4131. The examiner can normally be reached Monday to Friday from 8:00 am to 5:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Stephen S. Hong can be reached at (571) 272-4124. The fax phone number for the organization where this application or proceeding is assigned is (571) 272-2100.
